

## CLIMATE YEAR PROGRAM TO HAVE THE UNITED STATES COMMENCE A WORLD WAR II-SCALE MOBILIZATION TO RESTORE A SAFE CLIMATE

CES has received this invitation, which we pass on to you.

Allies,

We are thrilled to announce our new [Climate Year](#) program.

As part of our strategy to ensure that the US federal government commences a WWII-scale climate mobilization to restore a safe climate by July 4, 2017, we are looking for brilliant, talented, dedicated people who want to fight for civilization and the natural world on a full-time basis.

Participants in the Climate Year program will commit to volunteering for The Climate Mobilization 30+ hours per week for one year. Climate Year participants will take on significant leadership responsibilities, enjoy considerable autonomy, and continually push the limits of what they imagined possible.

We already have top-quality volunteers making full-time commitments, including oceanographer Danielle Meitiv and journalist Anya Grenier (read their impressive stories on the [Climate Year](#) website). But we need a lot more brilliant, passionate volunteers very soon if we are going to take The Climate Mobilization to the next level and ensure there is a climate emergency super-summit that charts a course toward solving the climate crisis in the first 100 days of the new administration early next year.

The Climate Year program, on its own, cannot deliver a WWII-scale mobilization by next year. It is one part of a much larger effort that is just now taking shape. We are working with Russell Greene—who helped get mobilization onto the Democratic Party platform in July—to develop a broader umbrella strategy to exponentially grow our movement and get the mobilization started next year.

We are looking for outstanding people ready to dedicate a year of their lives for "all years." We aim to enlist people from all backgrounds, walks of life, and US regions. We truly need all hands on deck: People of color, of all faiths, of all ages, of all political persuasions, from all sectors (including the fossil fuel industry), women, LGBTQIA, persons with disabilities, and veterans are strongly encouraged to apply.

[Apply NOW to Climate Year.](#)

If you can't afford to volunteer 30 hours a week, but are called to mobilize, please let us know what level of assistance you would need in order to participate in Climate Year.

We will do our best to meet your financial need. ([See more information about financial assistance here.](#))

Please apply or encourage the most talented, energetic, dedicated people you know to apply for Climate Year. Also, make sure to support us with a donation so we can provide financial assistance.

And make sure to share the news of Climate Year far and wide!

Sincerely,

Margaret Klein Salamon, Nicole Harris, Ezra Silk, and the ever expanding TCM team!
